Gloyer-Taylor Laboratories
Mr. Gloyer
112 Mitchell Blvd.
Tullahoma, TN 37388

Dear Mr. Gloyer,

My name is Alic Brigham and I would like to introduce myself as a candidate for a position as an Aerospace Engineer at Gloyer-Taylor Laboratories. I was referred to your company by Kelby Karcher, a classmate from college. Kelby speaks very highly of his time at GTL and has encouraged me to share my resume with you.

I am currently finishing my final 10 hours at The University of Tennessee as a student in the Aerospace Engineering program, and I am excited to make the transition into the aerospace work force. Presently, I am employed full time by Costco Wholesale working 30 hours a week where my responsibilities consist of member/customer service and assisting throughout the store in various other functions as needed and requested by store leadership.

During my time at UTK, I have worked on several aerospace propulsion projects including both liquid and hybrid rocket engines that focus on increasing the propulsive efficiency for implementation to aerospace systems. Some of the responsibilities I held for the hybrid rocket project were designing and iterating on the hybrid test matrices, organizing and allocating workloads to peers, such as telling a team member to have a blast shield for the valves designed and made, and running the test stand in a safe and efficient manner. In addition to leading the team of student peers and contributing technical work to the hybrid rocket research, I also helped develop a publication and eventually had the opportunity to present at the AIAA Energy and Propulsion conference in the summer of 2018.

With my educational background and work ethic, I feel confident that once trained, I will be able to provide consistent, quality work that will help you keep projects running smoothly. I am eager and ready to take on the challenges in which Gloyer-Taylor Laboratories could provide for me.

GTL is the type of company I dreamed of becoming a part of when I decided to become an engineer many years ago, and I'm thankful that you can provide me with this opportunity. Thank you for your time Mr. Gloyer and I hope to hear from you soon.

Thank you,
Alic Brigham

P.S. I would also like to mention that I have family ties in South Nashville and in Murfreesboro that connect me to the area near Tullahoma. This furthers my thoughts on this opening becoming a terrific long-term situation and relationship with you and your company.
