To whom it may concern:

I am applying for your composites level 1 position you have recently posted. I am very interested in the composites and aerospace industry and have left my previous field of work to pursue a new career in this growing field. As a previous automotive technician, problem solving, critical thinking and working with my hands is a daily occurrence in the field. Currently I am enrolled into a composites class offered by Abaris in Reno, Nevada. The class is currently scheduled for November 18th-22th. I am a very hard working individual with great attitude and great willingness to learn which would be a perfect fit for your company and position.

I hope to hear from you soon.
Thank you for your time and consideration

Sincerely, Cody nicot
